

Dr. Eleftherios Zachariou's career is a testament to his dedication and expertise in gynecology and obstetrics, with a particular focus on robotic and laparoscopic surgery. After completing his medical training at the prestigious National and Kapodistrian University of Athens, Greece, where he earned a scholarship, Dr. Zachariou graduated in 2016. His journey began as a general surgery resident at Elpis General Hospital in Athens, followed by his compulsory service as a Rural General Practitioner in Messinia's Health Centre of Meligala. His commitment to women's health led him to complete his specialty in Obstetrics and Gynecology at Alexandra Maternity Hospital. Dr. Zachariou further distinguished himself by earning a PhD in anatomy with distinction in 2021, reflecting his deep academic interest and dedication to advancing medical knowledge.

Passionate about minimally invasive surgery, Dr. Zachariou has extensively trained in gynecologic oncology, laparoscopy, and robotics. He has attended numerous courses and workshops, earning his Bachelor of Endoscopy certification in 2022 and the GESEA Level 2 Minimal Invasive Gynaecology Surgery certification in 2023. Additionally, he has completed the SERGS Level 1 criteria for basic robotic skills. Dr. Zachariou's commitment to academic excellence is evident through his involvement in research, publications, oral presentations, and teaching workshops. Currently, he serves as a Consultant in the Division of Robotic and Laparoscopic surgery at the 1st Gynaecology Department at Metropolitan General Hospital. His prolific contributions include 26 publications in peer-reviewed journals, numerous conference presentations, and multiple European-accredited certifications.
